We offer
products
with valuable
USP's

Capricorn Life Sciences is a trusted provider of unique, high quality products to many healthcare companies around the world.

Our product portfolio of Food Supplements, FSMP's and medical devices covers a broad range of therapeutic indications, including gynaecology/ women's health, urology, gastroenterology, pediatrics, immunology, cardiology, neurology, CNS and ENT.

Efficacy and safety of our products have been proven in clinical trials and/or are supported by approved EFSA claims.

Manufacturing is performed by various European GMP and/or HACCP approved factories, ensuring a guaranteed and constant high quality.

The products can be marketed under our ready brands but we are open to discuss supply under private label as well.

Complete EU regulatory dossiers and full regulatory support are provided.

Gyneacology / Women's health

CAREMILK tablets is a *food supplement* based on Galega officinalis, Milk thistle, dl-phosphoserine, Hay greek, Griffonia, Vitamin B12, Folic acid. It is indicated during breastfeeding to improve the lactogogue function thanks to galega officinalis, promoting mental and physical well-being.

CERVACARE spray composed of Carboxymethyl Betaglucan, EGCG from green tea, Resveratrol, Curcuminoids from curcuma longa for the symptomatic treatment of Human Papilloma Virus (HPV) infection. It has a moisturising and protective/ soothing effect that creates a protective barrier in the irritated or inflamed areas of the cervical-vaginal mucosa, protecting from external microbial agents and helping to maintain and control the physiological conditions of the cervical-vaginal mucosa by promoting rapid re-epithelialisation during inflammatory processes of an infectious or traumatic nature and useful for soothing inflammation and intimate itchiness. (*medical device Class I*)

FEMAFERRIN capsules, contain Lactoferrin, a circulating protein with a very high binding affinity for iron, providing antimicrobial properties and restoring iron localization through the direct or indirect modulation of hepcidin and ferroprotein synthesis, thus increasing hematological parameters of iron deficiency and iron deficiency anemia. It decreases serum IL-6 levels, thus inflammation, and prevents preterm delivery (*food supplement*).

FEMAFERRO tablets is a *food supplement* with Iron (Micronized Superdispersed Ferric Pyrophosphate), Folic acid, Vitamin C and Copper, indicated in cases of reduced dietary intake or increased need of these nutrients, especially during pregnancy and breastfeeding.

FEMAFLOR 1% and 3% gel based on Hyaluronic acid sodium salt, boric acid and lactic acid is a *medical device Class IIa* that helps to keep the natural defences of the vagina intact and restores the vaginal flora. It is also indicated in all situations in which an effective soothing effect is needed to relief discomfort caused by poor intimate lubrication.

FEMAFLOR WASH, a *medical device Class I* based on Boric acid, Aloe vera, Lactic acid and tea tree provides lubrication and maintains proper vaginal acidity to prevent infections. It also leaves a pleasant sensation of freshness and cleanliness after use.

FEMAFLOR ovules, is a *medical device Class IIa* based on Boric acid and Polycarbophil helpfull in restoring the natural pH of the vagina. The combined action of its components also reduces burning, itching and irritation, even in case of fungal infection.

FEMAFERTI GEL, a *medical device Class IIa* based on sugars, mineral salts, creatine, carnitine, Hyaluronic acid and Lactic acid. It creates an optimal environment for spermatozoa, assists maintaining a suitable pH for natural conception and is characterized by seminal fluid-compatible osmolality. The efficacy of this product is evidenced in a clinical trial.

FEMAGINAL vaginal douche, is a *medical device Class I* based on Hyaluronic acid and Lactic acid, helpful in maintaining proper vulvovaginal mucosa and proper acidity to avoid infections. It also provides lubrication and reduces irritation, burning and abnormal discharge.

FEMAGINAL ovules based on Hyaluronic acid, Lactic Acid and Polycarbophil for vaginal dryness, inflammation, infections and irritation of the vagina. (*medical device Class IIa*)

FEMAGINAL monodose gel based on Hyaluronic acid and Lactic Acid for vaginal dryness and women with fungal or bacterial vaginosis. (*medical device Class IIa*)

FEMAGINAL PLUS ovules is a *medical device Class IIa* based on an improved formula of Boric acid, Hyaluronic acid, Polycarbophil, Lactic acid, Tocopheryl acetate, Vitamin A, 18-Beta-glycyrrhetic acid and Tea tree oil, indicated in the treatment of vaginal dryness, irritations, burning and infections.

FEMANAU oral drops is a *food supplement* based on SOFALENINA® (Ginger glycerinextract, Sodium alginate), L-Alanine, Vit. B1, Vit. B2 and Vit. B6 for nausea and morning sickness, particularly associated with reflux symptoms.

FEMANAU tablets is a *food supplement* based on Ginger, L-Alanine, Vit. B1, Vit. B2 and Vit. B6 for nausea and morning sickness.

FEMANIN Complete oral tablets is a *food supplement* containing Fermented soy, Resveratrol, Magnesium, Melatonin, Vitamin D, Vitamin K, effective in the reduction of the menopause symptoms, with positive and preventive effects on bone health. It contributes in the reduction of the vasomotor annoyances (perspiration, bursts of heat), insomnia, nervousness, bad mood, libido decrease and helps to contrast the general organism and cutaneous, estrogen decrease caused, aging preventing the metabolism slowdown and the consequent weight increase. The efficacy of this product has been proven in 2 clinical trials.

FEMASEA capsules, a safe and well tolerated nutritional supplement (*food supplement*) based on Ginger, Magnesium and Vit. B6 for women who suffer from morning sickness or nausea during pregnancy.

FEMASITOL sachets, an extremely well documented product, available both as *food supplement* and as *Food for Special Medical Purposes* (“FSMP”) containing Myo-inositol and Folic acid that support ovulatory function, oocyte quality and menstrual cyclicality. It may be prescribed or advised before and during the 1st line of drug prescription for hypo fertility.

FEMASITOL 2.0 sachets, the new development Femasitol 2.0 contains an equal amount of myo-inositol to restore ovulation, optimize IVF procedures and prevent /manage gestational diabetes. The substitution of folic acid with 5-MTHF, the biologically active molecule, makes it possible to bypass MTHFR, and thus restart maternal-fetal metabolic processes and prevent neural tube defects, particularly in PCOS women at particular risk of folate deficiency. (*Food for Special Medical Purposes*, “FSMP”)

FEMASITOL PLUS sachets, is a FSMP containing Myo-inositol, 5-mTHF (Vitamine B9) on glucosamine salts and tyndallized Bifidobacterium animalis ssp lactis (CECT8145) for PCOS in women who also suffer from overweight: (1) The chance of pregnancy for PCOS obese patient is 63% lower than for PCOS women with normal weight; (2) 10% weight loss can increase the chance of pregnancy by 68% and (3) the probiotic Bifidobacterium animalis ssp lactis CECT8145, alive or heat-killed, reduces fat deposition via IGF-1 pathway.

FEMAVITA soft gelatine capsules provide a full range of essential vitamins and minerals for women before conception, during pregnancy and breastfeeding. (*food supplement*)

FERROCRIT capsules and oral sticks is a *food supplement*. The combination of iron saccharate, folic acid, vitamins B6 and B12 promotes normal red blood cells formation and helps reducing tiredness and fatigue. The combination is enriched with vitamin C and B to support a higher iron absorption and increase its availability for maximum efficacy and safety in Iron Deficiency Anaemia (IDA), IDA in specific patients: women, elderly and support to erythropoietin stimulating agents as proven in 2 clinical trials.

FERROTIQ vials is a *food supplement* based on Microemulsified Iron, Vit C, Lactoferrin, Zinc, Copper, Vit B12 and Quatrefolic® indicated in mild-moderate iron anaemia deficiency and malnutrition in children, adult, pregnant and lactating women.

HPVCARE oral capsules is a *food supplement* containing Vit.C, Zinc, Copper and a proprietary blend of Echinacea dry extract which promotes the physiological immune system of the body and is useful in case of vaginal infections and adjuvant in the recurrence of condylomatosis. Clinical trials show efficacy and reliability in the treatment of genital infections caused by Papilloma virus (HPV) and in the treatment of the incidence of recidivism and post-treatment genital condylomatosis.

OSTEOCALCIN tablets is a *food supplement* based on Calcium, Magnesium, Vit. K2 and Vit. D3 which contributes to normal muscle function and maintenance of normal bone structure, in particular in post-menopausal women and the elderly.

PRECARE sachets contains Calcium, Salix alba, Magnesium sulfate, Arginine and is useful in preeclampsia and eclampsia in pregnancy, preterm delivery, polyabortion and coagulopathies in pregnancy which has been documented in a clinical trial. (*food supplement*)

RESTOGYN-T vaginal tablets is a medical device based on Tyndallized Lactobacillus, Natural (Hydrolyzed/Fermented) Mix Milk Protein, Lactic acid and Fructo-oligosaccharides (FOS). The combined action of the components of Mivagyn T vaginal tabs restores the vaginal bacterial flora and pH reducing burning, itchiness and irritation even in case of fungal infection, keeping the natural vaginal defenses unaltered. It favors, once dissolved in vagina, the increase in endogenous Lactobacilli, that in association to the activity on the pH, disfavours the action of pathogenic microorganisms such as Streptococci and Candida.

VENONORM tablets is a *food supplement* containing μ SMIN® Plus (active micronized diosmin), Troxerutin and Coumarins (titrated Horse-chestnut dry extract) contributing to venous system efficiency, it preserves hemorrhoidal plexus trophism and supports regular lymphatic drainage. It can be used in cases of Chronic Venous Insufficiency, oedema and lymphedema and hemorrhoids. The efficacy of this product has been demonstrated in two clinical trials with some 200 patients.

Urology

ISITOL sachets, an *FSMP* based on Myo-inositol, Zinc, N-acetyl-cysteine, Vit. B2, B3, B6, Vit. E, 5-MethylTetrahydrofolates for the treatment of infertility in men. Documented in a randomized, double clinical trial.

Pediatrics

CAPRICALM Teething gel forms a protective barrier on the gums helping to prevent redness and irritation, promoting oral cavity hygiene oral and giving relief and freshness. Based on Aloe, Calendula, Chamomile, Honey and Xylitol.

CAPRICALM Soothing Paste is the ideal soothing paste to use with every diaper change. It is suitable for the daily protection of your child's delicate skin, helping to prevent redness and irritation. Based on Zinc Oxide (10%) and D-Panthenol (5%).

CAREMILK tablets, a *food supplement* based on Galega officinalis, Milk thistle, dl- phosphoserine, Hay greek, Griffonia, Vitamin B12, Folic acid. It's indicated during the breastfeeding to improve the lactation function thanks to galega officinalis, promoting mental and physical well-being.

DORMANORM drops is a *food supplement* based on Melatonin, Vit. B1, Vit. B2, Vit. B6 and Folic acid, specifically formulated to help children have peaceful rest and good night sleep, which during infancy is important for the correct development of babies.

ENGIA vials contain fresh royal jelly, vitamin B complex (B1, B2, B5, B6), vitamin D3, vitamin PP, vitamin C, iron, and glutamine. It is useful as a metabolic and energetic stimulus, helps to improve concentration and cognitive functions and relieves sensations due to stress and fatigue. The efficacy of this product has been documented in a clinical trial. (*food supplement*)

FEMANAU oral drops is a *food supplement* based on SOFALENINA® (Ginger glycerin extract, Sodium alginate), L-Alanine, Vit. B1, Vit. B2 and Vit. B6 for nausea and morning sickness, particularly associated with reflux symptoms.

FERROKIDS drops is a *food supplement* based on Microemulsified Iron®, Folic Acid and Copper useful in case of lacking or in increased need of Iron and as energetic stimulus. It supports the immune system, formation of red blood cells and hemoglobin and relieve from tiredness.

FERROTIQ vials is a *food supplement* based on Iron from Quatrefolic®, Microemulsified Iron, Vit C, Lactoferrin, Zinc, Copper, Vit B12, indicated in mild-moderate iron anemia deficiency and malnutrition in children, adult, pregnant and lactating women.

GASTIROM oral suspension in drops, a unique formulation of Simeticone dispersed in Olive oil, for better dispersion of Simeticone and increased activity of the compound, also containing Vit. A, Coenzyme Q10 and Vit. E. for the treatment of disorders of the gastrointestinal function including dyspeptic disorders, gastroenteric meteorism, aerofagy and gas colic in infants, children and adults. (*medical device Class IIa*)

MICRODUO, oral drops of *Saccharomyces Boulardii* for the restoration of normal gastrointestinal environment and Simeicone with anti-foaming activity for infants, children and adults.
(*medical device Class IIa*)

MICRONORM drops is a *food supplement* based on *Lactobacillus Reuteri* able to support the balance of intestinal flora. Micronorm can be used in infants and children; it can be used in combination with the use of antibiotics and during diarrheal episodes.

NAUHYDRON sachets is a *food supplement* based on ginger, vitamins and minerals. Thanks to its composition it is helpful in cases of nausea and to reintegrate vitamins and mineral after vomiting.

NEOHYDRON oral solution is a *food supplement* containing Mineral salts and vitamins, useful in cases of reduced dietary intake or increased need of these nutrients e.g. during episodes of diarrhoea.

VINERGIZE oral vials is a *food supplement* composed of cold liver oil, vitamins A, B1, D, E, pollen, royal jelly, glycine and Zinc. Royal jelly, vitamin D and glycine present restorative properties. Royal jelly is rich in essential amino acids, easily assimilable vitamins and minerals this is why royal jelly and pollen extract are of high nutritional value. Vitamin D promotes the absorption of calcium and phosphorus and contributes to the maintenance of normal bones. Glycine is required for connective tissue and muscle mass growth and health status maintenance. Thiamin, Graminex(R) and G63(R)* and zinc favour stimulate appetite. Cod liver oil, vitamin A and vitamin E counteract oxidative stress and aging, supporting the immune system's function. VINERGIZE (1) Contributes to stimulate physiological appetite in elderly and children; (2) Helps reduce fatigue including in the case of chronic ill patients; (3) Supports the physiological immune response; and (4) Brings micronutrients in highly absorbable form. The efficacy of this product has been demonstrated in a clinical trial.

Gastroenterology

ABCOL tablets is a *food supplement* composed from Sodium butyrate, Cumin and *Lactobacillus reuterii*. It rebalances the intestinal bacterial flora, thus favouring a normal digestive function and is useful in Irritable bowel syndrome, functional dyspepsia, gaseous colic, digestive problems, constipation, abdominal swelling and tension and colon-pathies.

COLNORM sachets and oral solution are medical devices Class IIa containing Macrogol 4000 (PEG) and Psyllium, ideal for treatment of constipation without risk of habituation, dehydration or flatulence in children and adults and constipation in pregnancy & breast feeding. It can also be used as colon cleansing preparation.

INDINORM, digestive product with a capsule-in-capsule dual release system (*food supplement*), allowing the delivery of the right enzymes to the right medium, with various applications:

- Functional indigestion due to digestive enzyme deficiency or imbalance, with such symptoms as dyspepsia, postprandial discomfort, epigastric fullness, and flatulence;
- Functional indigestion associated with pregnancy
- Functional digestive secretory function due to disease (as in chronic gastritis, pancreatitis, and enteritis) or surgery on the stomach, small intestine, pancreas and post gastrectomy syndrome.
- Digestive disturbances associated with some chronic diseases.
- Loss of appetite.
- Anorexia nervosa.

The efficacy of this product has been demonstrated in a clinical trial.

GASTIROM oral suspension in drops, a unique formulation of Simeticone dispersed in Olive oil, for better dispersion of Simeticone and increased activity of the compound, also containing Vit. A, Coenzyme Q10 and Vit. E. for the treatment of disorders of the gastrointestinal function including dyspeptic disorders, gastroenteric meteorism, aerofagy and gas colic in infants, children and adults. (*medical device Class IIa*)

GASTIROM Mag oral emulsion is a *medical device Class IIa* based on low molecular weight Hyaluronic Acid, Magnesium Alginate, Myrrh extract and Simethicone, useful for those patients that chronically suffer symptoms linked to the gastroesophageal reflux disease and need an extra-strong long-lasting relief, along with a practical use for everyday life.

GASTUCALM oral solution is a *medical device Class IIa* based on Sodium Alginate, Sodium Bicarbonate, Calcium Carbonate, Arabic Gum and Xanthan Gum, useful for those patients that occasionally suffer symptoms linked to the gastroesophageal reflux disease and need a fast and long-lasting relief. It contains Sodium alginate, which creates a viscous barrier capable of preventing the contents of the stomach from rising towards the oesophagus.

GASTUCALM PLUS oral gel is a *medical device Class IIa* based on Hyaluronic Acid Sodium Salt, Magnesium Alginate, Sodium Alginate, Simethicone and Mhyrr extract, useful for those patients that chronically suffer symptoms linked to the gastroesophageal reflux disease and need an long-lasting relieve. It contains Hyaluronic Acid, which hydrates and protects the mucous membranes of the gastroesophageal tract and supports the process of reconstruction of the damaged epithelium.

GASTUFLUX oral gel is a *medical device Class IIa* based on Magnesium Alginate, Simethicone, Xanthan Gum, Guar Seeds Flour and Arabic Gum, useful for those patients that occasionally suffer symptoms linked to the gastroesophageal reflux disease and need a fast and long-lasting relief. It contains Simethicone, which reduces the surface tension of the gases present in the gastric liquid, thus favouring their elimination.

GASTUSEN oral gel in stickpacks is a *medical device Class IIa* based on low molecular weight Hyaluronic Acid, Magnesium Alginate and Myrrh extract, useful for those patients that occasionally suffer symptoms linked to the gastroesophageal reflux disease (mild GERD for patients who experience mild symptoms once or twice a month)

GASTUSEN PLUS oral gel is a *medical device Class IIa* based on low molecular weight Hyaluronic Acid, Magnesium Alginate and Myrrh extract, useful for those patients that chronically suffer symptoms linked to the gastroesophageal reflux disease and that need a practical support in the everyday life, useful for those patients that chronically suffer symptoms linked to the gastroesophageal reflux (moderate GERD for patients experience more frequent symptoms requiring daily administration).

GASTUSOD oral emulsion is a *medical device Class IIa* based on low molecular weight Hyaluronic Acid, Sodium Alginate, Myrrh extract and Simethicone, useful for those patients that chronically suffer symptoms linked to the gastroesophageal reflux disease and need an extra-strong long-lasting relief.

MICRODUO Antireflux oral solution is a *medical device Class IIa* based on Sodium Alginate, Simethicone, Arabic Gum and Xanthan Gum, useful for those patients that occasionally suffer symptoms linked to the gastroesophageal reflux disease and need a fast relief from heartburn.

MICRODUO oral drops of *Saccharomyces Boulardii* for the restoration of normal gastrointestinal environment and Simethicone with anti-foaming activity for infants, children and adults. (*medical devices Class IIa*)

MICRONORM drops is a *food supplement* based on *Lactobacillus Reuteri* able to support the balance of intestinal flora. Micronorm can be used in infants and children; it can be used in combination with the use of antibiotics and during diarrheal episodes.

NAUHYDRON sachets is a *food supplement* based on Ginger, vitamins and minerals for nausea and rehydration.

NEOHYDRON sachets is a *food supplement* containing Mineral salts and vitamins, useful in cases of reduced dietary intake or increased need of these nutrients e.g. during episodes of diarrhoea.

Cardiology / Metabolism

ARTERINORM capsules is a *food supplement*, containing DIF1STAT(r) (*Monascus purpureus* Went, Linear aliphatic alcohols, Niacin), Green tea dry extract, Kuntze leaves, Maltodextrins, Vitamin E, which are beneficial for the physiological control of cholesterol plasma levels. The efficacy of this product is documented by a number of published clinical trials.

ARTERINORM 2.0 capsules based on Niacin, Folic acid, Vit E, Vit B6, Vit B12, *Olea europaea*, Linear aliphatic alcohols, Green tea, a new formula in line with new EU-regulations, effective against hypercholesteremia with efficacy proven in a clinical trial. (*food supplement*)

Immunology

PRONUTIM is a unique Whey Protein Isolate, high in native cysteine, produced by an exclusive microfiltration and spray drying process, to ensure protein integrity and cysteine bioavailability as glutathione precursor:

- HIGH PURITY, remarkable guaranteed titration $\geq 92.5\%$
- HIGH BIOLOGICAL VALUE protein.

PRONUTIM has the regulatory status of *FSMP (Food for Special Medical Purposes)*, as diet for people suffering from severe deficiency of proteins and/or glutathione, which can lead to a variety of health problems.

PRONUTIM is a protein module, particularly rich in the precursor of glutathione, useful in nutritional deficiencies with increased requirements and/or consumption of glutathione and in all cases in which support of the immune system is necessary, e.g.:

- oncology and immunocompromised patients
- chemo- or radiotherapy
- malnutrition caused by dialysis
- lean mass loss (sarcopenia)
- aging
- degenerative diseases
- pre and post important surgeries

PRONUTIM SOD contains a unique Whey Protein Isolate produced by microfiltration and spray drying process, with the addition of microencapsulated vegetable superoxide dismutase (SOD), which provides additional contribution to a protein diet. The SOD microencapsulation provides an enteric-coating protection able to inhibit SOD degradation during the digestive process. Being effectively protected, it passes through the stomach and entirely reaches the intestinal lumen where its biological activity begins. SOD supplementation is useful for:

- aging
 - immunomodulation
 - protection of liver function
 - recovery after intense physical activity
 - acute and chronic infections and chronic inflammations, like autoimmune rheumatic diseases (systemic lupus erythematosus, rheumatoid arthritis, scleroderma, immune-mediated vasculitis).
 - chronic neurodegenerative diseases, such as amyotrophic lateral sclerosis (ALS), particularly in its hereditary form where the mutation of the SOD1 antioxidant system is present.
- (food supplement)*

VINERGIZE oral vials is a food supplement composed of cold liver oil, vitamins A, B1, D, E, pollen, royal jelly, glycine and Zinc. Royal jelly, vitamin D and glycine present restorative properties. Royal jelly is rich in essential amino acids, easily assimilable vitamins and minerals this is why royal jelly and pollen extract are of high nutritional value. Vitamin D promotes the absorption of calcium and phosphorus and contributes to the maintenance of normal bones. Glycine is required for connective tissue and muscle mass growth and health status maintenance. Thiamin, Graminex(R) and G63(R)* and zinc favour stimulate appetite. Cod liver oil, vitamin A and vitamin E counteract oxidative stress and aging, supporting the immune system's function. VINERGIZE (1) Contributes to stimulate physiological appetite in elderly and children; (2) Helps reduce fatigue including in the case of chronic ill patients; (3) Supports the physiological immune response; and (4) Brings micronutrients in highly absorbable form. The efficacy of this product has been demonstrated in a clinical trial.

Orthopedics

ATRONI GEL, is a *medical device Class IIa* for topical use, based on ozonated olive oil, menthol and arnica providing relief in case of muscle, joint and rheumatic pain.

ATRONI sachets is a *food supplement* useful in the promotion of the articular cartilage normal function. It is capable to stimulate the collagen formation and to provide a support for those patients that suffer painful joint manifestations including muscle soreness, improvement of physical function, Sciatic nerve pain, localized states of tension.

CARTICROSS, injectable Hyaluronic Acid of biotechnological origin, designed for intra-articular use, to combat pain and reduced mobility caused by traumatic or degenerative articular alterations of knee or other synovial joints. *(medical device Class III)*

CNS

DOMA AFFRON capsules, prepared from a patented extraction process along with standardization of the strongest actives in Saffron, allows for a very effective product against stress and depression as proven in the clinical study, with Double Mechanism action against depression, stress and anxiety:

- Selective serotonin reuptake inhibitor (SSRI)(Similar mechanism to Fluoxetine-Prozac)
- Action against oxidative cellular stress.
- This allows for the below results in our clinical test:
- Improved mood
- Reduced negative feelings
- Increased vigor
- Reduced stress and anxiety

(food supplement)

NUCINO tablets is a *food supplement* is based on an association of L-acetyl carnitine, vitamin B12 and standardized extract of Ginkgo biloba that preserves synaptic transmission and microvascular circulation. It is helpful in mild cognitive impairment & vascular dementia and peripheral neuropathies (e.g. diabetes), tinnitus, vertigo and dizziness. Two clinical studies showed that Nucino tablets improved nerve conduction velocity, reduced neuropathic pain, improved recovery of vestibulo-oculomotor reflex and improved general clinical picture.

DOMAZEN tablets is a *food supplement* containing Sensoril® (Withania somnifera), Hawthorn d.e., Magnesium and Vitamin B6 that promotes relaxation and mental health. It relieves anxiety and improves the emotional tone; facilitates relaxation and sleep; and reduces palpitations and promotes blood pressure regulation. The efficacy of this product has been documented in two clinical trials with in total more than 500 patients.

FERROCRIT capsules and oral sticks is a *food supplement*. The combination of iron saccharate, folic acid, vitamins B6 and B12 promotes normal red blood cells formation and helps reducing tiredness and fatigue. The combination is enriched with vitamin C and B to support a higher iron absorption and increase its availability for maximum efficacy and safety in Iron Deficiency Anaemia (IDA), IDA in specific patients: women, elderly and support to erythropoietin stimulating agents as proven in 2 clinical trials.

Endocrinology

ARTERINORM capsules is a *food supplement*, containing a complex of natural substances which are beneficial for the physiological control of cholesterol plasma levels. The efficacy of this product is documented by a number of published clinical trials.

ARTERINORM 2.0 capsules based on Niacin, Folic acid, Vit E, Vit B6, Vit B12, Olea europaea, Linear aliphatic alcohols, Green tea, a new formula in line with new EU-regulations, effective against hypercholesteremia with efficacy proven in a clinical trial. (*food supplement*)

NUROM bi-layer tablets, is a combination of natural elements, based on Alpha-Lipoic acid, Carnosine, Zinc and Vitamin B with clinical trials showing efficacy in the prevention and treatment of (diabetic) neuropathy. NUROM can also be used in Peripheral Neuropathies: due to compression, trauma, inflammation, resulting in the use of other drugs, pain after surgery, ect. (*food supplement*)

Neurology

NUROM bi-layer tablets, is a combination of natural elements, based on Alpha-Lipoic acid, Carnosine, Zinc and Vitamin B with clinical trials showing efficacy in the prevention and treatment of (diabetic) neuropathy. NUROM can also be used in Peripheral Neuropathies: due to compression, trauma, inflammation, resulting in the use of other drugs, pain after surgery, ect. (*food supplement*)

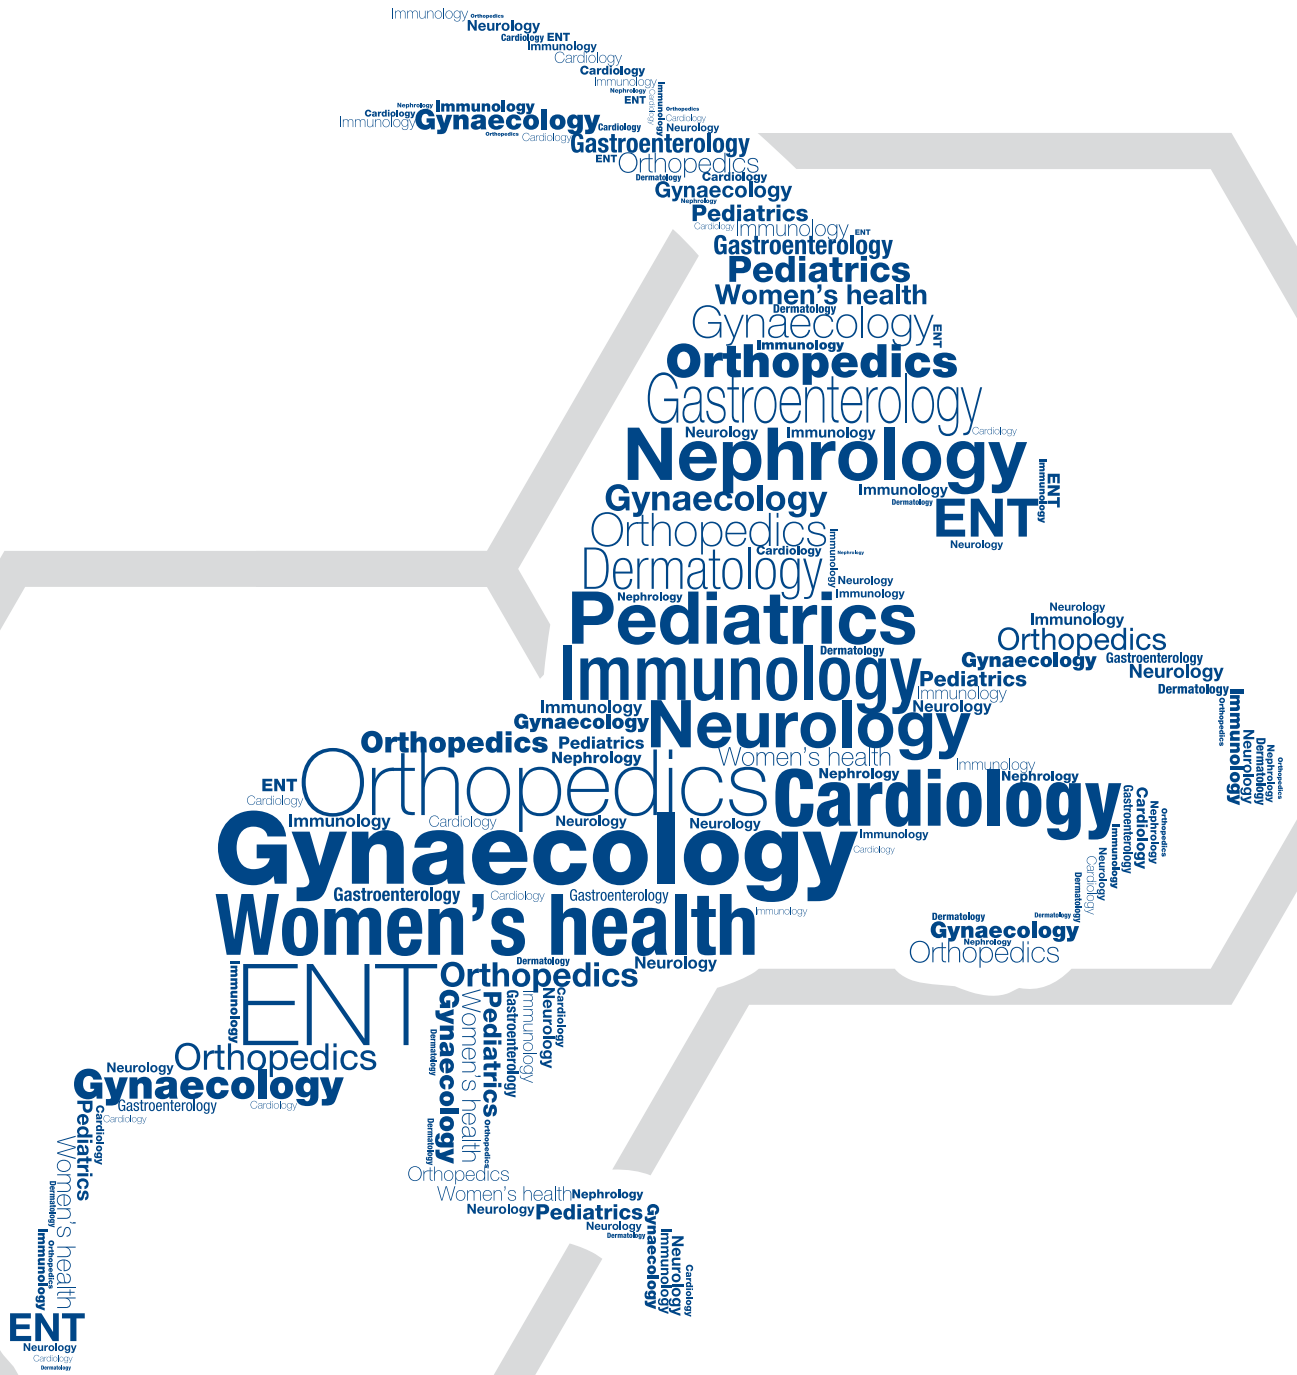

NUCINO tablets is a *food supplement* is based on an association of L-acetyl carnitine, vitamin B12 and standardized extract of Ginkgo biloba that preserves synaptic transmission and microvascular circulation. It is helpful in mild cognitive impairment & vascular dementia and peripheral neuropathies (e.g. diabetes), tinnitus, vertigo and dizziness. Two clinical studies showed that Nucino tablets improved nerve conduction velocity, reduced neuropathic pain, improved recovery of vestibulo-oculomotor reflex and improved general clinical picture.

E.N.T.

MUCONIS sachets is a *food supplement* based on N-acetylcysteine, Enzymes from fermented maltodextrins, Riboflavin and Vitamin C indicated in respiratory diseases with viscous hypersecretion, respiratory diseases with painful inflammation and respiratory diseases with bacterial infection as it fluidifies mucus and increases clearance, turns off airway inflammation and secretion and counteracts biofilms and antibiotic resistance. The efficacy of this product has been demonstrated in a clinical trial.

MUCONIS nasal spray is a *medical device Class IIa* based on N-acetylcysteine and Chloride which facilitates the fluidification and mechanical removal of mucus and/or mucopurulent secretions stagnant inside the nasal cavity and inside the paranasal sinuses. It acts by fluidifying the mucus through the physical/mechanical action of its components and is indicated in: Fluidification of airways secretions; Decongests mucosa; Supports mucociliary clearance; and improves the symptoms and the course of acute, subacute and chronic inflammation of the upper respiratory track.
